Our suggestion for this Project

This project is very complex in the nature of the contract, it is. If given to a large number of vendors to complete the task, the same may result in subjects with different levels of understanding and skill set.

The project entails creating, managing, and administration of centers which can train teachers, faculties, students, and pupil with the knowledge of Business English as desired.

There are 03 major components that the system needs to address.

- Management and Administration of Centers of delivery
- 2. Standardized Delivery of Instructional Material
- 3. Progress Monitoring and Testing of Students on the basis of Skill Set Attained.

Any of this goes wrong, the whole system collapses, and all effort deployed shall be wasted. At DewSoft, we feel we have a strong control and specialization to address all the needs of the project, with our past experience in the field of Education, Administration and running franchisees.

We can assure you of the best possible results with our experience.
